- The teacher & review material was amazing. If students were given this material @ the beginning of the semester our national average would increase greatly.
- Having lots of practice questions to go over in class is really great, to see where you go wrong & how to properly complete a question.

Hey Mark! Thanks for being a great sport and reviewing all kinds of math with me. You're a pretty smart guy and you seem to enjoy yourself up there.

Marc is an awesome instructor, as was Darcy. They both are very knowledgeable class was kept fun & well paced.

- * Marc made the prep fun and enjoyable
- * went through each unit fully

Mark is a fantastic teacher, wish I had him the whole year at my school, jealous of my friend who he teaches at St. Mary's

Having multiple teachers in the room helped when I needed help on a specific issue. Marc was funny and made class go by as quickly as possible.
